## Practice quiz on Tangent Lines to Functions

**NÚMERO TOTAL DE PONTOS 2** 

Suppose that  $f: \mathbb{R} \to \mathbb{R}$  is a function. Which of the following expressions corresponds to f'(2), the slope of the tangent line to the graph of f(x) at x = 2?

1 / 1 ponto

$$\bigcap f'(2) = mx + b$$

• 
$$f'(2) = \lim_{h \to 0} \frac{f(2+h)-f(2)}{h}$$

$$Of'(2) = \lim_{h \to 0} \frac{f(a+h) - f(a)}{h}$$

$$f'(2) = 2$$

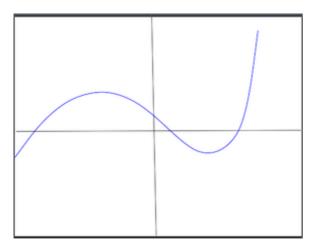

This expression can be obtained from the first screen of our video by plugging in 2 for a.

2.

1 / 1 ponto

Suppose that  $h: \mathbb{R} \to \mathbb{R}$  is a function whose graph is shown as the blue curve in the figure. For how many values of a is h'(a) = 0?

- $\bigcirc$  3
- Never
- Always
- 2

## ✓ Correto

 $h^{'}(a)$  gives the slope of the tangent line to the graph of h at the point x=a.

When h'(a) = 0, this means that the tangent line is horizontal.

There are two places (one on each side of the y-axis) where this tangent line is horizontal, so this answer is correct.
